The characteristics of anginal symptoms and the results of exercise testing are considered of great importance for selecting medical treatment in patients with chronic stable angina pectoris. Recently reported results have been excellent. In this study, ambulatory ST segment monitoring was performed in 60 patients

This article presents a contemporary overview of the management of patients. There are limited data to guide the optimum approach to patients presenting with angina after coronary artery bypass grafting CABG. Full Text Available Resumen:

Although it is frequently thought that the spasm occurs in arteries without log-rank statistics revealed
