We will be driven by utmost professionalism aimed at achieving the best client patronage. You have to go for a specialised training to get up to date on how to repair newly manufactured small engines. Operators in this industry also need access to the OEM service information so as to be able to correctly identify an engine before carrying out repairs or replacing certain parts especially as most small engine manufacturers produce a wide variety of engines.

We intend to ensure that their welfare packages are the best across similar states. As time progresses, Management will continually increase the scope of the business by developing additional engine repair services that will increase the profitability of the business. Also, the text of the business plan is formatted with a fully automated table of contents. Below is a breakdown of how these funds will be used:

We have an investment strategy that goes towards promoting our business in the United States. According to the United States Bureau of Labor Statistics (BLS), as of 2010 there were more than 70,000 small engine mechanics with the prediction that this number will increase to more than 75,000 by 2015.
